PUBLIC MASS MEETING
ENDORSES BOND ISSUE

SPIRITED DISCUSSION OF BOND
ISSUE AND WATER QUESTION
—A GOOD ATTENDANCE

The public mass meeting at the Woman's club house Monday night was well attended and a number of ladies were present to show their interest in civic affairs and lend their approval to the bond issue to be voted on February 10th.

Col. Holabird spoke informally on the matter of water supply and strongly recommended that the city acquire the exclusive and permanent water rights of the Little Santa Anita Canyon, and a thorough investigation of the prospect of developing additional gravity water from that source.

Earl Topping gave figures of surface water measurements, taken on a recent trip up the canon, showing that at least 30 inches was flowing down the canyon and its tributaries, which might be greatly increased by tunnels or other development, and strongly urged that it be collected and piped into our water system.

Many others spoke and while some doubted the quantity of water that might be obtained from the upper canyon no one depreciated the great advantage and economy of more gravity flowing water if it could be obtained.

The writer is convinced from personal observation that there is a lot of water up there which the city should be using, and in self protection we should acquire the right to it now while it may be obtained at a reasonable price, for it is certain to appreciate in value in the years to come.

We believe that the bonds will sell at a premium, and that the estimates of City Engineer Mackerras are liberal in each item and that after the absolutely necessary repairs, replacements and extensions of the water system there will be sufficient money left to acquire the water rights of the canyon and some experimental work.

Anyway, all of this has nothing to do with the coming bond issue ex-

cept to emphasize its necessity, and this seemed to be the sense of the meeting, which expressed itself in a standing vote for the bonds.
Vote for the bonds.

ASSOCIATED CHAMBERS
WILL MEET IN COVINA

The February meeting of the Associated Chambers of Commerce of the San Gabriel Valley will be held at Covina, Tuesday, February 3. The banquet will be served by the ladies of the Monday afternoon club, in the Woman's Club House, on Citrus avenue. The hour will be 6:30 p. m., sharp.

The principal speaker on this occasion will be Edward F. Trefz, formerly secretary of the United Chamber of Commerce. Mr. Trefz is a gifted speaker and recognized throughout the United States as an authority on the commercial and business interests of the country.

Members of Sierra Madre Board of Trade wishing to attend will notify James N. Hawks, secretary.

FAMOUS DOGS GO FOR PRIZES

Chris Shuttleworth, editor of the Kennel Advocate, and one of the best posted dog fanciers in the country, will take a number of prize winners to New York, Monday, to enter in the Annual International Dog show at Madison Square Garden, Feb. 11 to 14.

These dogs are from the famous Anaokia kennels, of which Mr. Shuttleworth is manager, and the good wishes of his many friends here go with him. We all hope that Chris will pull down a number of good first prizes in the big show.

ANOTHER GOOD SERIAL

Next week The News will begin the publication of a new serial story by Edgar Rice Burroughs entitled, "Tarzan and the Jewels of Opar."

Most every boy has read the Tarzan stories and the latest one is pronounced to be the best that Mr. Burroughs has written.

Begin with the opening chapter next week and follow it through to the end.

DECREASING WATER SUPPLY

LOOKING INTO THE FUTURE
FOR WATER WITH WHICH TO
SUPPLY SIERRA MADRE

There is more water in the mountains than we are now getting and we want it.

There is plenty of water in the pool from which we are now pumping for present needs, but it is getting lower and lower each year and we want to go deeper so it won't recede below our pumping level.

Without an ample supply of city water there will be no city of Sierra Madre. WE MUST HAVE IT to preserve life, animal and human.

A glance at the chart at top of last page shows the rainfall for the last thirty years and it will be seen that the amount is decreasing at this period of the cycle. Government weather officials and other experts also predict that this year and the next at least, there will be less than the normal amount of precipitation. This will affect the level of the water in the underground pool from which we pump our water as well as the amount flowing through our gravity pipeline.

To be sure we had enough water this past season, but it was because we had two wells and one of them was deep enough to go below the receding level of the pool. The other one (the old one) was practically useless because the water fell below the pump and it is for this reason that it is proposed to dig down still farther.

To accomplish any or all of these proposed things we must have money and the bond issue is to provide it. As shown last week, the tax rate increase is but a trifle, only 18 cents per hundred dollars actual valuation.

Vote for the bonds and watch Sierra Madre grow.

NEW CHURCH BUILDING

At a recent business meeting of the Bethany Church it was decided to build a new church building and we understand that over \$4,000.00 has already been subscribed for that purpose.

Our latest information is that the

site has not been definitely decided upon, but the location most favorably considered is on Baldwin Ave., across the street, south, from Welscher's store.

This is another step forward for Sierra Madre and is in the line of progress she will follow, in this year 1920.

LOCAL TALENT A STAR

The production of Shakespeare's comedy, "The Tempest," by the community players of Pasadena this week is of special interest to this community, as Mrs. Milton Steinberger is playing the leading woman's part.

After the initial performance, Mrs. Steinberger was most enthusiastically congratulated on her presentation of the character of "Miranda" by the director and other members of the company.

Mrs. Steinberger appears on the program under her maiden name of Virginia Timberlake.

The entire performance was very smooth and most excellent in detail, all the characters being well presented, and the lighting effects were of unusual beauty.

JUDGE FOUND HIM GUILTY

B. Lampert, who was tried last week for selling furniture, alleged to have been taken from a house while the owner was absent, was found guilty by Judge Forman and fined \$75.00.

Lampert was a temporary resident here and besides buying second hand furniture and junk did a trucking business. He claimed that some man sold him the furniture in question, but was unable to substantiate the claim. The News is not informed to what locality Mr. Lampert will move.

NEW BUILDINGS

Plans are being made by James K. Burke of Riverside for the erection of three bungalows for renting purposes at Grand View and Baldwin avenues. A local contractor will probably get the contract and start work in the near future.

Vote for the bonds.

PUBLIC MASS MEETING
BY BOARD OF TRADE

AT WOMAN'S CLUB HOUSE, WED-
NESDAY, FEB. 4, TO DIS-
CUSS BOND ISSUE

The regular monthly meeting of the Board of Trade will be held in the Woman's club house next Wednesday evening. It will be an open meeting and the public is not only invited but urged to be present.

The object of this open meeting is to discuss the coming bond election and every taxpayer should be present, as the more information we can get on the subject the better we will understand.

A WISTARIA BABY

Mr. and Mrs. Harold Mattison, who occupy the Fennel bungalow on Scenic Point, are the proud parents of a brand new 8½-pound boy who came Sunday morning.

This is the first baby to be born in the shadow of the wonderful wistaria vine which has made the home of H. T. Fennel famous throughout the United States and the News extends congratulations to everybody concerned.

SIERRA MADRE MENTION

Los Angeles Times: Nestling in a "cul-de-sac" along the Sierra Madre Mountains, between Lamanda Park and Arcadia, this wonderful health resort, for those afflicted with pulmonary ailments, is steadily growing year by year, its former orchards of oranges and lemons gradually being converted into choice residential sites.

Less than twenty years ago a scattered colony of health seekers, principally from England, represented the population of 200. Today the census will reach the 2000 mark.

From a hamlet consisting of ranches, tent houses and shacks, surrounded by cow paths, crooked lanes and dusty roads, there is an up-to-date city of the sixth class with all municipal conveniences, containing many handsome show places and substantial residences.

Pioneers of the city delight in

voicing the beneficial effects of this salubrious climate, many featuring themselves as "Before and after taking" specimens. The known curative powers of the climate here are daily advertised by civic bodies and those interested in building a larger city, and a constructive campaign along these lines has been taken up. Out of a selection, by medical experts, of ten of the best places in the world for the treatment of chest and throat trouble, a recent medical congress held this city to be one of the best three selected.

A seventeen-mile ride on the Pacific Electric railway, along Huntington boulevard and skirting the foothill boulevard, brings one in fifty minutes to this beautiful thriving city with its miles of paved streets, where the resident enjoys quietude, rest and all the natural beauties of the surrounding canyons and mountains, a bountiful supply of sparkling mountain water for domestic and irrigation purposes, and an ideal climate with civic comforts, entertainments, excellent schools for the younger set and where genial good fellowship prevails.

Vote for the bonds.

EIGHTY YEARS OLD

The News is in receipt of a unique birthday card announcing the age of one of our well known citizens, which we quote as follows:

"Gosh all Hemlock! Ye old sinner is still kicking. W. H. Scott, Granville, Ohio, 1840; Sierra Madre, Cal., January 24, 1920. Gee whiz! I'm four score! Sure Pop!"

The News congratulates the captain and sincerely hopes that he will finish out the twenty, making it an even century.

HAD GOOD MEETING

Rev. W. J. Thompson addressed the monthly meeting of the Men's Brotherhood of the Methodist Church at Long Beach last week. The meeting was held in the Grace Methodist Church and Mr. Thompson reports a large attendance and a glorious good time.

Vote for the bonds.

"CALIFORNIA FIG SYRUP" IS CHILD'S LAXATIVE

Look at tongue! Remove poisons from stomach, liver and bowels.

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative or physic for the little stomach, liver and bowels. Children love its delicious fruity taste. Full directions for child's dose on each bottle. Give it without fear.

Mother! You must say "California!"—Adv.

Ungallant.

I had my tiny niece out for a stroll the other day. She caught sight of a little chap on the steps of a house and she slowed up and kept gazing at him. I finally told her to hurry up or the little boy would take her in his house to live. The young chap, overhearing me, said: "Oh, no, I won't; we've got two of 'em now."—Exchange.

LONG FACES

"Cascarets" for Liver and Bowels bring back Smiles

Turn the "kill-joys" out—the headache, biliousness, indigestion, the sick, sour stomach and misery-making gases—turn them out tonight and keep them out with Cascarets.

Millions of men and women take a Cascaret now and then and never know the misery caused by a lazy liver, clogged bowels, or an upset stomach. Don't put in another day of distress. Let Cascarets cleanse your stomach; remove the sour, fermenting food; take the excess bile from your liver and carry out all the constipated waste matter and poison in the bowels. Then you will feel great.

A Cascaret tonight straightens you out by morning. They work while you sleep.—Adv.

No Accounting for Tastes.

"Did you ever fall in love with a bareback rider in a circus when you were a boy?"

"No," replied Mr. Grimkin. "People used to say I was a queer boy. I passed up the bareback rider and the lovely trapeze performers in their pink and white tights to worship at the shrine of a snake charmer of mature years."—Birmingham Age-Herald.

ASPIRIN FOR COLDS

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Colds, Pain, Headache, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

HENRY S. GRAVES
(Prepared by the United States Department of Agriculture.)

Explaining before the tri-state forestry conference how the United States is rapidly exhausting its timber resources and at a comparatively early date may find itself largely dependent upon foreign sources, Lieut. Col. Henry S. Graves, chief of the forest service, United States department of agriculture, told the remedies that can be applied, and the measures that can be adopted, particularly in Indiana, Ohio and Illinois, the three states for which the conference was held.

"The solution of our forestry problem," said Colonel Graves, "consists in stopping destruction by fire and other agencies, by using methods that make possible natural reproduction after logging, and by restocking the tree growth of lands that have been made economic wastes. The fear has been expressed by some that such an objective conflicts with the expansion of agriculture and stock raising. Exactly the contrary would be the result. No sane program of forestry would propose the use of lands for forestry that are better adapted to agriculture and settlement. Forestry, agriculture and stock raising go hand in hand.

"In Illinois, Indiana and Ohio our problem is essentially one of the farm woodland. Here we have to do with small tracts and operations. In some ways the problem is a simpler one than in the great lumber regions. In the first place, the fire danger is easily controlled. Then again the work can usually be brought into close correlation with other phases of farm management. Of great value, also, is the fact that the owner himself is often the manager and can give personal direction to the work of forestry.

"In such circumstances the aid of the states may be directed to showing the farmer how to cut his woodland in order to secure natural reproduction, how to thin the young stands so as to increase their growth and value, how to reforest the lands now waste, how best to market his woodland products, and so on. Advice should be afforded through the state forester and the agricultural field agents. Planting stock should be offered at cost with assistance in establishing successful plantations. Co-operative marketing enterprises should be encouraged when this is practical."

Discussing the function of the federal government in meeting the forestry problem, Colonel Graves said: "The federal government has not given adequate assistance to the states. Direct aid to the states by the government, made contingent on adoption by the former of acceptable programs of forest legislation and administration, would help to secure concurrent action in different states, enable the standardization of methods, and enable the achievement of results impossible without such aid.

"The first step in inaugurating a national policy of forestry is a federal law providing the authority to co-operate with the states in formulating and carrying out a program of forestry, and carrying an appropriation that can be used to assist such states as inaugurate and put into effect a program determined to be adequate by the secretary of agriculture. A great deal can be accomplished pending such substantial co-operation, but with the aid that the nation might offer, results that otherwise would be impossible could be accomplished."

The forest situation, Colonel Graves pointed out, is of peculiar interest to Indiana, Illinois and Ohio. All three states have a pressing problem of producing home-grown forests. They are also vitally concerned in the forest situation in other parts of the country, for they are large consumers of lumber and other wood products and the greater part of what they use already is brought in from other states.

"Illinois, Indiana and Ohio," he said, "together with the neighboring portions of Michigan and Wisconsin, constitute the most important center of manufacturing industries in the country—that is, the industries making vehicles, furniture, railway cars,

A Sane National Forestry Program

CHARLES LATHROP PACK

tools, planing-mill products and the like. About one-third of the total capital invested in the wood-manufacturing industries of the country and about one-third of the wage earners in these industries are found in this section. They use five and a half billion feet of lumber a year, or about a quarter of the aggregate used in this country for such enterprises.

"Today the home product does not nearly meet the annual requirements, but, further than that, the cutting that is done far exceeds what is grown each year. It is probable, from the best estimates that I have been able to secure, that the annual growth of material of potential value in the three states is not over one-quarter of what is cut each year. This means that the forests are progressively losing ground with considerable rapidity.

"This deficit is due only in part to the clearing of land for agriculture. It is due also to the failure to handle the lands in a way to secure good reproduction and properly to protect the young trees that become established. With better care and management the forest lands of these states should yield two or three times the present growth, and this would, I believe, be possible without checking the extension of cultivation over lands suited to that purpose. There are many convincing reasons why these states should produce as much as possible in the way of forest growth from land that is best adapted to that purpose—and in the aggregate these areas amount to a great deal."

GET TOGETHER

"The United States must decide upon a national forest policy in order to perpetuate its timber supply," says Charles Lathrop Pack, president of the American Forestry association. We are far behind France, Great Britain, Germany, Japan and other nations in this respect.

The United States has only about one-fourth of its original forest and this is now disappearing three times faster than it is being reproduced. We must, before it is all gone, provide for a timber supply for our future needs and we can do so if foresters get together with the lumbermen and timberland owners and agree upon a practical, workable forest policy. The country is grateful to Col. Henry S. Graves, United States forester, for demanding a national forest policy at this time, and the foresters are the men whom the country ex-

pects to formulate this forest policy. It is their business to do it and to do it well.

The national and state governments hold only some 3 per cent of merchantable timber. Therefore, the majority of the owners of the timber must be in accord with any policy dictating the management, the protection, and the reforestation of their land before it can be successful. You cannot compel an owner to develop and perpetuate his timberland at a financial loss; if you wish him to reforest his land, you must make it pay him, as other countries do.

One most important feature of a national forest policy on which agreement is possible is fire protection. Forest fires have this year caused millions of dollars of damage in the northwest. The United States forest service spent more than a million dollars fighting these fires in July alone. Private agencies spent lavishly in protecting their lands but the fire protection measures in neither national state or private forests are sufficient to properly protect them. Get together then on a national, state and private forest fire protection program. It is the need of the hour and when this has been done the first step toward a mutually satisfactory national forest policy will have been made. Other features of this policy are certain to follow in due course.

VALUE OF FORESTS

"So important are forests in the life of a nation that Germany will find that France will insist upon Germany's paying in lumber for the casualties of the French forests which were destroyed during the war," declares P. S. Ridsdale, secretary of the American Forestry association, who has made a tour of the allied countries. Mr. Ridsdale went to Europe to investigate forest losses in France, Belgium, Italy and Great Britain, so that the American Forestry association might determine how America could help to replace the destroyed forests of Europe by presenting forest seed to the various governments.

"In northern France many of the forests," he says, "have been so badly smashed by shell, shrapnel and rifle fire, or so badly cut for trench timbers, fuel wood and other supplies for the contending armies that they have been virtually destroyed. They can be restored only by replanting."

"The agricultural land lying between the forests in various sectors of the battle front have been so torn to pieces by shell fire that it is no longer serviceable for agriculture and like the devastated forests, will have to be planted with forest tree seed so that in years to come the shell holes may be filled by gradual erosion and the humus of the soil restored."

"Italy, Belgium and Great Britain will make similar requests."

to the great value of this treatment; and urging the establishment of a sanatorium in southern California, Colorado or New Mexico where the greatest amount of sunshine is to be found. Some seashore locations are almost, if not quite, as suitable as far as the amount of sunshine is concerned, but there are some other favorable features in the southern and western locations. Sunlight has been found to be one of the best cures for torpid wounds, gangrene, frostbite and other similar lesions. It is not the heat in

Sufficient Reason.

The reason there are several things we don't eat for fear of making ourselves fat is because buying them would make us poor.—Dallas News

PE-RU-NA Made Me a Well Man

Mr. Louis Young, 1652 Clifford St., Rochester, N. Y., writes:
"I suffered for thirty years with chronic bowel trouble, stomach trouble and hemorrhages of the bowels. We bought a bottle of Peru-na and I took it faithfully, and I began to feel better. My wife persuaded me to continue, and I took it for some time as directed. Now I am a well man."

Suffered thirty years with stomach trouble and hemorrhages of the bowels.

Liquid or Tablet Form

Then He Vanished. Gwendoline, the eighteen-year-old daughter of the family, had received a splendid present from her young man, an engagement ring set with diamonds and rubies.

That evening at tea, when the happy pair were present, the conversation, naturally enough, turned to jewelry, and someone remarked that it was funny to think that we got pearls from oysters.

Whereupon Gwendoline's horrid little brother edged towards the door and remarked loudly:

"Oh, that's not half so funny as getting rings from mugs, is it, Gwen?"—London Answers.

HER FADED, SHABBY APPAREL DYED NEW

"Diamond Dyes" Freshen Up Old, Discarded Garments.

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.—Adv.

NOT LOOKING FOR TROUBLE

Rastus Knew That Hornet Had Back-which Could Make Reprisals in Quick Order.

Some students at Princeton were discussing the need and the probable effectiveness of a new students' organization, says Everybody's Magazine, when Tom, who had just returned from his summer vacation, related the following experiences on his father's plantation:

Finding Rastus ready to go to town with a load of produce, Tom joined him.

Now, Rastus was a good driver, expert with the whip and somewhat of a philosopher. On the way to town a large horsefly lit on the ear of one of the leaders of the four-mule team. Rastus cracked his whip and killed it.

As they rode along he killed a bee in the petals of a rose in the same manner. Tom, surprised, saw a tree growing over the road, on a branch of which was a hornet's nest. "As we go by, Rastus, hit that," said Tom, pointing to the nest.

Rastus paid no attention to the request nor the nest.

"Why didn't you hit it, Rastus?" asked Tom.

After a pause and a fierce look, Rastus replied: "No, sir; that's organized."

Extravagance.

Bridge Player (to partner who is playing worse even than usually)—Whenever I have you for a partner, Smyth, I feel I'm living beyond my means.

Spoils It.

Helen—I think Jack is simply wonderful. Maud—Yes; the trouble is he thinks so too.

Inconstancy. "Your wife said the other day at a meeting that married women were so driven they were only white slaves." "That's just like a woman. And she gave me no peace until I bought her a new chain."

HURRY! YOUR HAIR NEEDS "DANDERINE"

Get rid of every bit of that ugly dandruff and stop falling hair.

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub well into the scalp. After several applications all dandruff usually goes and hair stops coming out. Every hair in your head soon shows new life, vigor, brightness, thickness and more color.—Adv.

KNEW HOW TO MAKE IT FIT

Backwoodsman Little Troubled by Fact That Cap He Purchased Was Too Small.

Early in the autumn a man from the backwoods wandered into a Syracuse gent's furnishing store. Here the shiny winter caps caught his eye.

After gazing at these a long time he said:

"How much you want for one o' them caps?"

"One dollar," rejoined the clerk.

"Try this one on, sir."

But this proved to be a size or so too small, sitting upon the woodchopper's head like a peanut on a barrel.

"Here's y'r dollar, mister. I'll take this cap."

"But the cap's too small," declared the amazed clerk, pushing back the proffered dollar. "Wait till you try—"

"Oh, I'll fix this so's it'll fit," was the backwoodsman's final exchange before starting off with his purchase.

"When I get home all I'll have to do is to slit its back up with a knife, lace it with a shoestring, and everything'll be all hunkydory!"—Rehoboth Sunday Herald.

Knew Where He Came In.

Avery was wearing his new suit when one of the neighbors chanced to call. After admiring it she turned to Donald, who was busy building a block house on the floor. "I suppose you will be having a new suit of clothes next," she remarked.

"Huh," grunted Donald. "I won't get any new clothes till Avery's outgrown that suit and ma can make it over for me."

WITH THE CHURCHES

CONGREGATIONAL

Rev. W. J. Thompson, minister.
129 W. Central. Phone Green 36.
A Community Church, open to all
who believe in the Lord Jesus Christ.
9:45 A. M.—Sunday School; Mr.
George B. Morgridge, superintendent.
Adult Bible class, Mr. C. Tiebout.

11:00 A. M. — Morning Service;
Subject: "The Finest Place in the
World."

7:30 P. M. — Evening Service.
Subject: "Why Christ is Supreme."
6:30 p. m. Christian Endeavor Society.

7:30 p.m. each Wednesday; Mid-
Week Service.

8:00 p.m. each Thursday, (at par-
sonage) Teachers club.

You are cordially invited to all of
the above meetings.

After the morning worship the Com-
munion service will be observed.

The Christian Endeavor Society
which was recently reorganized is
growing very rapidly and much in-
terest is being manifest. Miss Tarr
is president.

The Ladies Aid society of the Con-
gregational church will hold a busi-
ness meeting in the church parlors
Tuesday, Feb. 3, at 3 o'clock.

Mr. George B. Morgridge, superin-
tendent of the Sunday school, was
given authority to have erected a
room on the north side of the church
to be used for the adult Bible class,
which, under the leadership of Mr. C.
A. Tibbott, has outgrown any present
available quarters.

The attendance of the Sunday
school has steadily grown since the
new year. For three consecutive
Sundays the record of last year was
broken, the last and largest atten-
dance being 135.

BUSINESS MEETING

On Jan. 22 the General Board of
the Congregational church met at
the home of Mr. Newhan Essick for
a business meeting at which church
problems and plans for the year were
discussed and acted on.

Rev. W. J. Thompson reported the
organization on the previous Sunday
of an enthusiastic Christian Endeavor
society. He also reported that the
newly organized Teachers club for
Sunday school teachers and others
interested in the study of the Holy
Scriptures which meets at the par-
sonage at 8 p. m. each Thursday eve-
ning, was creating much interest. A
committee was appointed to organi-
ze a Men's club from the men of
the congregation and any others in-
terested.

CHURCH OF THE ASCENSION

The Rev. Wm. Carson Shaw, Rector
Sunday Services.

8:00 A. M.—Holy Communion.

9:45 A. M.—Sunday School.

11:00 A. M.—Morning Prayer.

6:30 P. M. — Church instruction
class.

7:30 P. M.—Evening Prayer.

On every Sunday evening at 6:30,
in the Guild room, is held a class for
Church instruction, under the direction
of the Rector. This gives an op-
portunity for informal questions and
instruction on the Church teaching.
All who are in any way interested are
most cordially invited to attend.

CHRISTIAN SCIENCE SOCIETY

Services of the Christian Science
Society of Sierra Madre will be held
hereafter in the Kindergarten Build-
ing, West Highland Ave.

9:30 a. m. Sunday School.

11:00 a. m. Morning Services.

Testimony meeting, Wednesday, 8
o'clock p. m.

Subject for Sunday morning:
"Love."

BETHANY

Dr. W. H. Rawlings, Pastor.
9:45 a. m. Bible School. Adult
Bible class conducted by Mr. Francis
D. R. Moote.

11:00 a.m. Morning service.

7:00 p.m. Prayer meeting.

7:30 p.m. Evening service.

7:30 p. m. (Wed.) Prayer Meeting.

2:30 p.m. Thursday, Bible class at

Mrs. M. O. Downs' on Victoria
Lane.

The placard with the words of the
song Dr. Rawlings so graciously
wrote for the school at Christmas
time is completed and hangs in the
front of the hall where every pupil
can see it and the children are learn-
ing to sing their new song with en-
thusiasm.

Now that it is becoming somewhat
known that the Rev. Dr. Rawlings of
London is speaking here every Sun-
day people are motoring in from
Glendora, Pasadena and other ad-
joining towns to hear him preach,
and are regretting the fact that they
have not heard him from the begin-
ning of the present series of sermons
on the Second Advent of the Lord.

The usual mid-week service was an
especially gracious meeting this week
for every heart was full of praise and
thanksgiving to God for the new

church building, which is soon to be
erected.

THEOSOPHY

A class for children in the study of
Theosophy is held at 162 East Central
Ave. on Sunday at 10 a. m. under the
direction of Children's School of The-
osophy, United Lodge of Theoso-
phists. All are welcome. No charges
or collections.

SMALL THINGS COUNT

Not every one can boast a name
That's echoed in the halls of fame;
Approval every word acclaim,
Great philanthropic deeds the same.
One may review with deep regret
Life's efforts that have failed and yet
Find memorized treasures brightly set
Amid ruins one had best forget.
One may of vaunted deeds have few,
Have seemed to little worth accrue;
Keep this consoling truth in view—
There's good for each and all to do.
— A. L. Soran.

LOCAL ITEMS

An interesting column of school
news will be found on the last page.

Mr. W. M. Gray and family of Anaheim have rented a cottage at 324 Sycamore Place

Governor William H. Stephens was the guest of Mrs. F. J. Hart at "Hartwood" on Thursday.

Mrs. Robert Mitchell has been quite ill for several days with influenza but is slowly improving.

Mrs. Emeline Clark will leave Monday on a pleasure trip to San Francisco and expects to be gone about ten days.

Mr. and Mrs. Ben Lyon and small son of Los Angeles spent the weekend with Mrs. L. E. Lyon on N. Auburn street.

Mrs. Valentine Leahl and little daughter, Florentina, of Long Beach visited her brother, J. F. Whiting, here the last of last week.

Mrs. Alma Chambers will have charge of the office of the Southern California Edison company, which will open Monday morning.

Mr and Mrs. M. E. Divers, who have recently sold their property at 119 E. Highland to A. J. Barker, are leaving this week to make their new home at Venice.

The Woman's club column, one of the most interesting features in The News, has been transferred to the last page, where it will appear each week in the future.

Mrs. J. Colton of Los Angeles was visiting friends in Sierra Madre Monday. Mrs. Colton is a former resident of Sierra Madre and will be remembered as Mrs. L. N. Legendre.

E. W. Camp is in Washington, D. C., where he is engaged on a big citrus case in the supreme court. Before returning, Mr. Camp will go on to New York City, to visit his son, Charles.

Mr. William Weinrich and Mr. and Mrs. David Davies of Columbus, Ohio, and Miss Smith of Chicago were luncheon guests on Tuesday of Mrs. Clara E. Harley and Mrs. Anna B. Brandt.

Mrs. Walter Lynch and children children will leave today for Chino, where they will make their future home. Mr. and Mrs. Lynch will be missed by a large circle of friends in this community.

Mr. and Mrs. J. W. Keys have returned to Sierra Madre, having recently sold their home in Pasadena. They will reside for the present with Mrs. Keys' mother, Mrs. E. M. Brooks, on East Central.

Miss Margaret Benson has resigned her position at the Hibernian bank in Los Angeles and left this week for Springfield, Colorado, where she has accepted a similar position in a bank. She will reside with her brother, Elwood Benton, and family.

Louis C. Brooks, manager of the Blinn Lumber Co., moved his family from Los Angeles yesterday. They occupy the property at the corner of Santa Anita Court and Sierra Madre Place, where Mr. Lynch formerly lived.

Mr. and Mrs. W. A. Smith of Mt. Carmel, Ill., are visiting their daughter, Mrs. J. F. Whiting, and will remain several weeks. They are both enthusiastic over the beauty and climate of Sierra Madre as compared with the freezing atmosphere of Illinois.

Mrs. J. D. Mathews of Enpalme, Sonora, Mexico, came to Sierra Madre last week and was joined by her brother, Capt. Frank D. Shearer, of Los Angeles, for the purpose of celebrating the birthday of their mother, Mrs. Tillie Shearer. Mrs. Shearer was made happy in having her two sons and daughter with her on that day and letters and remembrances from the only absent one, a daughter in Vancouver, rounded out the event.

EXPERT PRUNER WANTED

Wanted, an expert pruner; will pay seventy-five cents an hour. F. A. Mills, Pasadena.

COOKED FOOD SALE

The ladies of St. Rita's Altar society will give a home cooked food sale at Welsher's store tomorrow, (Saturday). "Come and get it."

SOUTH DAKOTA RE-UNION

Everybody that ever lived in South Dakota is invited to attend the reunion and picnic at Sycamore Grove tomorrow, Saturday, January 31. Bring lunch. Free coffee.

WEEK AT BEACH

Mr. and Mrs. W. J. Miller, together with their son, William, who is convalescing from a recent severe illness are spending the week at Redondo Beach, where it is hoped the change will be beneficial to their son's health.

ENTERTAINED WITH DINNER

A number of Sierra Madrans were guests on Saturday evening at a party given at the home of Mr. and Mrs. S. H. Kent in South Pasadena. Those who attended from here were Mr. and Mrs. F. P. Sperry, Mrs. E. W. Camp, Mrs. Frank Hart, Mr. and Mrs. W. J. Lawless, Dean and Mrs. William Carson Shaw.

ATTEND DANCING PARTY

Last Saturday evening, Miss Gladys Walker, Miss Harriet Sperry and Mr. Cedric Tarr attended a dancing party at the Hotel Terrados at Sierra Vista, which was given by Miss Dorothy Ball and Miss Bheulah Folks. About 250 guests were present.

ENTERTAINS WITH LUNCHEON

Mrs. F. J. Hart of "Hartwood" entertained with a charming luncheon on Tuesday in honor of Mrs. G. Hallet Johnson, who is spending a week here, before joining Mr. Johnson at El Paso.

Mrs. Johnson is a former resident of Sierra Madre and sister of Mrs. W. H. Ingraham.

DIED

Mrs. Mary Wyatt, aged 67 years, died at her home -69 Grove street, on Tuesday, Jan. 27.

Deceased leaves a daughter, Mrs. Carrie Brandenburg, of Van Nuys, and a son, E. F. Wyatt, to mourn her loss.

Funeral services were held at Allen T. Gay's undertaking parlors on Thursday, Rev. W. J. Thompson officiating.

Cremation took place at Mountain View cemetery, Pasadena.

MRS. ONIE E. BROCK DIES IN SIERRA MADRE FRIDAY

Mrs. Onie E. Brock died at her home in Sierra Madre last Friday. Funeral services were held in Allen T. Gay's undertaking parlors, conducted by Rev. W. H. Stubbins and Rev. W. J. Thompson.

She was formerly Miss Meta Johanna Boub and was born near Frankfort, Spink county, South Dakota, May 19, 1890. She spent her early childhood in Redfield, South Dakota, later moving to Aberdeen, South Dakota, where she graduated with her class in 1908 from the Aberdeen High school.

In 1909 she joined her sister in Seattle, Washington, where she taught school until her marriage to Onie E. Brock on Feb. 2, 1916. She came to California one year ago because of ill health and lived in Sierra Madre until her death on Jan. 24, 1920. Her sisters, Wava and Emma, were with her the last few weeks before her death.

She is survived by her husband, Onie E. Brock of Sierra Madre, three sisters, Mrs. Luella Glenn of St. Paul, Emma Boub of Seattle, Wash.; Wava Boub of Frankfort, S. D., and two brothers, Leroy Boub of Williston, N. D., and Oscar Boub of Redfield, S. D., besides her many friends.

The body will be taken back to the Redfield, S. D., for burial in the family lot.

CARD OF THANKS

We wish to express our gratitude and sincere thanks to the many friends who so kindly aided us in our recent bereavement, and for the beautiful floral offerings.

PUBLIC HIGHWAYS

FINDING WEAR OF HIGHWAYS

Instrument Recently Designed and Made to Determine Wear of Concrete and Other Roads.

(Prepared by the United States Department of Agriculture.)

Every user of concrete and other improved highways will be interested in an instrument which has recently been designed and made in the research division of the bureau of public roads, for measuring wear of concrete and other surfaces. The instrument consists essentially of two bearing plates each 2 inches in diameter, pivoted on uniform joints to a spanner 11 1/2 inches long. In the mid point is mounted a micrometer whose plunger has a travel of 1 inch and whose dial is graduated to read 10

Measures Wear of Roads.

one one-thousandth of an inch. In order to form a base to which measurements can be referred from year to year, brass plugs are set in the pavement where readings are desired. Readings are taken by resting the bearing plates on the road's surface and allowing the plunger to rest on the base plate of the plug. The instrument is plumbed with the aid of a level and the spanner bar is held parallel to the center line of the road. Other readings may be taken with the bar at right angles to the center line of the road.

An important advantage of this instrument is that accurate data can be acquired rapidly and without interrupting traffic. The base plate in the pavement is protected between readings by covering it with cotton waste and topping with putty. The brass plugs are readily set in any pavement while it is being laid, and at any future time by drilling holes with star drills and setting the plug in cement grout.

PAY ATTENTION TO ROADSIDE

It Should Be One of First Places by Which Appearance of the Farm Is Improved.

Some farmers evidently consider the roadside along their farms as distinctly separate from and wholly outside of their jurisdiction, and any time or labor expended in keeping it up as so much gratuitously donated to the public. Every farmer should consider the roadside along his farm as deserving as much of his attention as the farm itself. He should consider the road the "front way" to his farm, and instead of its receiving secondary attention, it should be one of the first places by which the appearance of the farm is improved.

MOVEMENT TO BETTER ROADS

State of Maine Votes to Increase Bonded Indebtedness From \$2,000,000 to \$10,000,000.

(Prepared by the United States Department of Agriculture.)

Maine, by an overwhelming vote, recently indorsed the proposal to raise the bonded indebtedness of state highways from \$2,000,000 to \$10,000,000 giving an additional \$8,000,000 to be spent on the state road system. This is one of the instances showing a country-wide movement for better highways, as reported to the United States department of agriculture, which administers the federal aid road act.

Roads Not Developed.

That the roads in this country, although greatly improved since the coming of the automobile, are not yet universally developed to the point where they should be was demonstrated during the stress of war.

Save Truck Owners Money.

Truck owners know that good roads not only save them money but the shipper and public as well, because they can make faster time and at a saving in operating expense.

WINTER in SWITZERLAND

St. Moritz in Winter.

NOW that peace has come, Switzerland is busily preparing to assume her old place as the favorite playground of the old world. The little Helvetian republic of proverbial beauty, and far more beautiful still in the eyes of many—for as an angel of mercy has she shown her real worth in the world's tragedy—is fairly brimming over with attractions sought by lovers of the medieval and quaint and curious, and will now more than ever become a haven of blissful rest and healthful enjoyment, writes Marie Widmer in the New York Herald.

During the last five winters, in spite of the war, the numerous winter sport resorts tucked away in all those lovely spots over 3,000 feet above sea level, managed to have a "season" on a limited scale, and now that conditions are once more becoming normal it is expected that the winter 1919-1920 will see a great many visitors flock to that snowclad Alpine land, which, although in the midst of that fierce turmoil, has remained intact.

Switzerland in her winter garb! To the newcomer it means a vision of paradise—to the habitue a coming home to a beloved haunt. Once a master study in artistic color combinations, the country appears now as a glorious symphony in white. Jack Frost has imprinted a silencing kiss upon the babbling lips of every tiny brook and mountain stream and glistening sheets of ice cover also the limpid blue eyes of ponds and Alpine lakes. Ice and snow everywhere and above a glorious expanse of deep blue sky. The air itself seems to have gained some new miraculous qualities and faces which yesterday looked weary and tired have a cheerful and energetic expression today.

Land of Winter Sports.

For the natives the time of pleasant sociability has now come. Visits between friends and relatives are frequently interchanged—by sleigh in the case of the older set, and by ski in the case of the younger generation. Even some of the passes are quite animated, as winter is the time of the great transport of merchandise over mountains, such as the Veltin wines in the case of the Grisons. From the high lying pastures they slide down to the valley the hay which had been stored in the picturesque huts, and the woodcutters, in their turn, are busy in the high forest. The proud tree-trunks fall cracking before the axe and hatchet, and the logs dart like arrows down snow-runs to the traffic-beaten roads below.

Nowhere on earth have the possibilities of winter sport been more keenly realized than in Switzerland, and that is why we find in this small land such a great choice of resorts which possess scientifically laid out toboggan and bobsleigh runs, ice rinks, thrilling ski-jump, etc.

Very soon we find everybody interested and engaged in some form of winter sport. There is skating, of course, but many games compete now with this oldest of sports on the ice, which has, however, been developed into an art which charms the onlooker by the gracefulness of its movements, now astonishes by the cool daring of its swift rushes.

As in summer over the lawn, so flies the tennis ball over the ice in the game of hockey. Curlers are frantically sweeping their "stones" toward the coveted goal, and the unlimited diversity of gymnastic stunts offers constant amusement for the players as well as for the onlookers.

The improved appliances for sport requirements have nearly ousted the old-fashioned herdsman's sleds, which are now only occasionally used by timid beginners. The up-to-date vehicle is the so-called skeleton, a low, yard-long toboggan, on which the rider lies flat, steering the craft with hands and feet.

Like an arrow it darts up to the red walls of the curves, and as the bewildered spectator fearfully anticipates an accident, the toboggan shoots down into the furrow and around a beautifully shaped curve.

One of the most attractive, and certainly a very social sport, is bobsleighbing. Long, low padded toboggans, seating as many as six persons are used, and under this heavy burden the bobsleigh shoots down its course with amazing speed. As the leader sways, almost automatically the closely crowded team bend themselves, thus guiding the sleigh to the right or left; they apply a brake by letting themselves drop on the snow or drive to greater swiftness by bending forward like jockeys. Strong iron spikes, which are driven by a lever into the ice, enable the leader to stop the vehicle almost instantly, but a sudden application of these brakes whirls up the ice and snow in clouds, shaking and jolting the riders.

Ski-ing has taken root to an extraordinary extent in Switzerland. Even the poorest youth does not want to do without skis, though they might only consist of a couple of crudely adjusted barrel staves. Thanks to the ski the boys and girls living on remotely situated farms are now able to attend school every day; their parents are no longer isolated for the best part of the long winter months, and thanks also to these "wooden wings" the mail and newspapers can be delivered regularly.

Sport is furthermore made easier by the different mountain railways, which in winter run toboggan trains. Thus one can travel a couple of stations upward and arrive at the starting point of a mountain road without exertion and waste of time. Then one can descend to the valley on toboggan, ski or skates, or vice-versa, go down first and return by train to winter quarters.

Races, competitions, sleigh drives, ice carnivals, ski excursions and an equal variety of fascinating indoor entertainments transplant the happy winter visitor into a totally different world where sorrow and care seem to be banished and where every human being seems to realize that the best life after all is found right next to Nature's heart.

Had Long Experience.

Romance is very powerful, but some things much more common are more so. Take for instance hunger. The other day a young bride and bridegroom came from a little country town to Indianapolis to buy furniture for their new home. About 11:30 the bridegroom departed on an errand and told his wife that he would meet her at 12:30 at a certain restaurant.

He was detained until almost one o'clock. Then he rushed into the restaurant and found his new bride very calmly eating the lunch she had ordered. Amazed, he rushed to her table. "Oh, I was so worried over being late," he began, "I was so afraid you couldn't eat without me."

The bride looked up from her soup. "Why, I did it for 23 years," she returned, and turned to her roast pork and apple sauce.—Indianapolis News.

America's First Newspaper.

The first real newspaper, continuously printed, in America was the Boston News Letter, of which the initial number was published 215 years ago. A single number of a journal called Publick Occurrences, Foreign and Domestic, had been printed a little more than thirteen years before; but, like many of its successors, its first number was also its last. John Campbell was the entire staff of the News Letter, from managing editor to printer's "devil." The publication lasted 72 years and its circulation remained steady at about 500 copies weekly.

Too Bad.

He was young and handsome. She was younger and beautiful. She seemed to hang over every word he spoke. Suddenly his handsome face darkened with repugnance. "It's too bad!" he exclaimed. The beautiful girl paled. Nevertheless, her sensitive nostrils quivered. She knew he was right. So she took the egg away and brought him another. And she didn't charge it on the check!

AVOID TROUBLES OF AUTO ENGINE

If Owner Expects Enjoyment and Comfort Out of Car He Must Take Care of It.

WATCH FOR UNUSUAL NOISES

Locate Squeaks and Lubricate Parts Affected—Motorist Who Seems Lucky With Car Is One Who Looks After Details.

If you want to get enjoyment and comfort out of your car you must take care of it as you would a fine horse. Therefore you must:

Not race the engine unnecessarily. Have your ear tuned for every unusual noise. If it is a squeak locate and lubricate the part. If it is some other noise find the loose part that causes it and tighten it right away.

Do not tinker about the engine when it isn't necessary. Half the ability to make an adjustment or repair is the ability to discover its necessity.

Motorist Who Seems "Lucky."

Have you ever noticed the motorist who seems "lucky" with his car, who never seems to have a bit of trouble, who keeps it neat and whose engine always starts immediately the self-starter is pressed; who doesn't have any breakdowns while on the road, nor curse the manufacturer for building

Inspect Your Engine Systematically Once a Week—You Will Save Money.

such a car? It isn't luck at all. With all adjustments properly taken care of, every bearing and working part lubricated, the whole car will run perfectly and will continue to run with only a wee bit of attention.

In neglecting details you save time and inconvenience to be sure but eventually you will find a bad break and what time you have saved will be wasted in expensive repairs.

Avoid Accidents.

Never drive your car at high speed over any road, much less a rough or a slippery one. The slight gain in time will be offset by the risk of an accident and the pounding and racking which the car will receive.

It has been proven that the owner who drives his car at average speeds of from twenty-five to thirty-five miles an hour over all sorts of roads pays much more per mile for gasoline, oil and tires than the driver who watches constantly for rough places and avoids them and who drives at a rate of eighteen to twenty miles per hour. A car which is driven at a high rate of speed is usually in the repair shop often, which adds much more to the cost per mile of operation.

It is not how many miles are covered in a certain time, but the number of miles of useful travel that can be obtained at the least cost for fuel, oil, tires and repairs.—Popular Science Monthly.

Carburetor Vibration.

In fitting a new carburetor be sure that there is no looseness to cause vibration, because if there is, a broken flange will be the inevitable result.

Wire Wheels.

Wire wheels should be carefully inspected at frequent intervals.

LINE UP WHEELS TO SAVE COSTLY TIRES

Not as Difficult a Task as Many People Think.

Detailed Instructions, With Illustration, Showing Just How Operation May Be Performed—Make Auto Steer Easily.

Everybody knows that if the two front wheels of the automobile are not parallel, or nearly so, the side-slip of one of them, usually the right wheel, results in ruining the tires in a few hundred miles.

Few people, however, know how easy it is to measure the wheels and keep them parallel. The sketch given here-with makes it clear. Take a piece of two by three inch scantling, or any stiff board which will lie flat under the car. Make two triangles, somewhat like carpenter's squares, out of three pieces of wood, as shown. One of these

Lining Up Wheels.

is to be fastened permanently to the scantling and the other is separate. Measure the exact height of the center of the hubs of the front wheels from the ground, and drive a long nail or screw through the upper part of each triangle so that the point of the screw will be at the same height as the center of the hub. This is important.

See that the car is standing on a level spot—a concrete floor is best. Place the scantling under the car so that the tip of the fixed screw touches the inside rim of the wheel at the rear edge. Take the movable triangle and slide it along until the tip of the movable screw touches the inside rim of the opposite wheel. Mark this position on the scantling.

Now move the apparatus to the front of the wheels and take another measurement of the distance between rims, marking on the scantling as before. The difference between the two marks on the scantling will show how much the wheels are out of true, and this can be corrected by changing the adjustment on the cross connection between the steering arms.

To make the car steer easily and hold the road closely, the front wheels should not be exactly parallel, but should "toe in" slightly—that is, the distance between the rims at the height of the hub should be about one-quarter inch less at the front of the wheels than at the back.

AUTOMOBILE GOSSIP

Never make adjustments of any kind on the engine unless it is hot.

The top should never be folded when damp or wet, but should be kept open until thoroughly dry.

The driver of a truck or converter using pneumatic tires must be careful never to leave the end of a tire valve uncovered.

Car owners should get into the habit of using belt dressing on the clutch leather to swell it and act as a remedy for slippage.

Do not forget that the ground connection of the ignition circuit should have a dependable connection to the metal parts of the car.

It is very important that regular inspections should be made of the leather coverings or "boots" which protect the universals and other parts.

ANCIENT VINTAGES OF AUTOS APPEAR IN JUBILEE OF FRENCH TOURING CLUB

Many strange and cumbersome cars made appearance at the jubilee review held by the Touring club of France. The club has a membership of over 100,000 and some of the older members who had old-fashioned models stored away in their barns got them out for the parade.

The most unusual exhibit was a model of 1894, which is shown in the photo.

You do not buy family Silverware every day, which is a very good reason why you should consider carefully that which you decide upon but once.

PROVED CURVATURE OF EARTH

Scientist Settled Disputed Question, But Loser Proved Himself to Be "Poor Sport."

It will scarcely be believed that the question of the shape of the earth could ever have disturbed the peaceful atmosphere of the law courts. Yet in 1879 the question, indirectly, indeed did come before three learned judges, and the case excited a deal of interest and amazement. The circumstances were as follows:

The plaintiff, one Hampden, entertained the opinion that the world was not round, and issued an advertisement in a paper challenging philosophers, divines and scientific professors to prove contrary from Scripture, reason or fact. He deposited \$2,500 in a bank, to be forfeited to anyone who could prove to the satisfaction of any intelligent referee that there was such a thing as a convex railway, canal or lake.

The challenge was taken up by no less a person than the late Prof. Alfred Russell Wallace, who proved to the satisfaction of the referee the curvature to and fro of the Bedford level canal between Whitney bridge and Welsh's dam (six miles) to the extent of five feet, more or less, and the \$2,500 was paid over to him.

But he did not keep it. The plaintiff apparently began to see that he was making a fool of himself, and brought an action and recovered back his deposit on the ground that the whole affair was a wager, and therefore illegal.—Springfield Republican.

LURE TO THE ADVENTUROUS

Through All the Ages Man Has Dared Every Danger in the Search for Beautiful Things.

Now, a thing of beauty that is rare and difficult to obtain seems ever to have exercised an irresistible lure to adventurous man. To possess it he will suffer the hardships of the highest mountain climb, or risk the almost certain dangers of disease in tropic zones. He will dare death at the hands of savage enemies and pursue his quest far into the regions of unknown wilds.

Into the depths of shark-infested seas he dives with the hope of securing a lustrous pearl. Then to the top-most Alpine peak he climbs for a rare specimen of the edelweiss. A glittering jewel in an idol's head may tempt him to invade the sacred precincts of an Indian temple, or a beautiful flower lure him far into the primeval forests of Brazil, Colombia or Peru.

To this spirit the civilized world owes not only its greatest geographic discoveries and important additions to scientific knowledge, but to it is also due the discovery of many of nature's choicest things of beauty, things whose practical value may be but slight, but whose appeal is to the artistic and aesthetic sense.—National Geographic Society Bulletin.

Japanese Masks of Shame.

One of the most unusual features of a Japanese court to a stranger is the fact that each prisoner has his head covered by a wicker mask, more like an inverted waste-basket than anything else, the object of which is to prevent recognition of the prisoner, to permit him to hide his shame under the disguise and, very possibly, to prevent him from making a bolt for liberty.

The sight of a prisoner so arrayed is ghastly, the mask bringing up the suggestion of the hangman's cap.

Once in the prisoners' box, however, the masks are removed, while the prisoners sit with deeply bowed heads in an attitude of the utmost humility.—Boston Post.

Novel Stunt in Advertising.

They are not so slow in Russia as many of us imagine. An American relates that while in Moscow before the war he one day saw a crowd gathered around a little fellow who was bawling at the top of his lungs. Many asked him what the trouble was, but he kept on crying, and the crowd increased; then all of a sudden he stopped and said in a clear, loud voice: "I am lost. Will somebody please take me home to Ivan Tobinsky, the champion clothier of Moscow, who has a full supply of autumn overcoats, suits, neckties, shirts, hats and umbrellas, which he will sell cheaper than anyone else in the city."—Boston Transcript.

Caffeine From Holly Plant.

One of the many species of American holly, the one known scientifically as "Ilex vomitoria," has been found by chemists to contain large amounts of the drug caffeine, one to one and a half per cent being available from the dried leaves.—Popular Mechanics Magazine.

Identified.

The alarming report from Scotland that a parrot had developed rabies has proved to be incorrect. The bird, it appears, was merely endeavoring to imitate the bagpipes.—Punch, London.

Our Woman's Department

This Department is edited by Julia Bottomley, Associate Editor of the Ladies' Home Journal, and Nellie Maxwell, a National authority on Domestic Economy, for the pleasure and profit of the Ladies of Sierra Madre and vicinity.—J. F. Whiting, Editor

THE KITCHEN CABINET

He is not educated who refuses to eat whatever is set before him.—G. Stanley Hall.

The above presupposes an educated cook who will provide food which is eatable.—N. M.

SEASONABLE GOOD THINGS.

The dessert adds the finishing touch to the meal. It should be appropriate, that is, following a heavy meal be light and dainty, or a meal less substantial may have a more filling dessert. The dessert is valued for its decorative effect as well as for its food value.

Date Pudding.—Boil together ten minutes two cups of water three-fourths of a cup of brown sugar, and three tablespoonfuls of cornstarch. Add one cup of sliced dates. Mold in sherbet cups. Garnish with whipped cream and chopped nuts, or pieces of cherry or dates.

Apple Snow.—Pare, core and cut about four apples into quarters. Cover with boiling water and cook slowly until the apples are soft and the water has almost evaporated. Cool, put through a vegetable sieve. Add powdered sugar to taste and fold in as much whipped cream as you have apple pulp. Chill and serve.

Peach Cup.—Take eight canned peaches, two eggs, one-half cup of milk, one and one-half cups of flour, three tablespoonfuls of baking powder, one-half teaspoonful of salt, and one teaspoonful of butter. Mash two of the peaches and add the well-beaten yolks of eggs. Add the milk and the dry ingredients sifted together. Add butter melted. Beat the mixture in a buttered custard cup, add half a peach, cover with batter, sprinkle the top with sugar and bake in a moderate oven twenty minutes. Serve with whipped cream or a hard sauce.

Apricot Whip.—Take two cups of apricots, one-half cup of sugar, one teaspoonful of lemon juice and the whites of two eggs. Wash and soak the apricots. Cook in the same water until soft. Remove stones and rub through a sieve. Add sugar and cook five minutes. Beat the whites of the eggs until stiff and fold them into the apricot pulp when it is cold. Add lemon juice. Bake in a buttered baking dish for twenty minutes. Serve with cream or custard sauce.

"Go forth this day with the smallest expectations, but with the largest patience, with a keen relish for and appreciation of everything beautiful, great and good, but with a temper so genial that the friction of the world shall not bear upon your sensibilities."

TABLE DAINTIES.

For a cake out of the ordinary, try one made from the following recipe: **Lightning Cake.**—Cream a half cupful of shortening, gradually, with half a cupful of sugar, four beaten egg yolks, three tablespoonfuls of milk and one cupful of sifted flour, with a teaspoonful of baking powder. Spread the mixture in a shallow pan and over it spread the frosting whose recipe is given below; dredge with sugar and cinnamon, and bake thirty minutes. For serving, cut in strips about two inches long and one inch wide.

Frosting for Lightning Cake.—Beat four egg whites very light, gradually add three-fourths of a cupful of sugar and a half cupful of blanched and shredded almonds. Spread on the uncooked cake dough and sprinkle with one tablespoonful of sugar mixed with half a teaspoonful of cinnamon.

Rhubarb and Raisin Jelly.—Cook three dozen large, choice raisins in boiling water to cover, until tender. Add more water if needed. Cook until tender two cups of rhubarb cut in small bits, with one cupful of sugar; shake the pan to keep the pieces unbroken. Soften two tablespoonfuls of gelatin in half a cupful of cold water, then add the raisins and hot liquid to dissolve the gelatin; add rhubarb and turn into a mold. When cold and firm, serve unmolded with whipped cream. There should be a scant quart of material, counting the water in which the gelatin was softened.

Baked Ham.—Take a slice of ham two inches thick, parboil in water to nearly cover. Remove the ham to a baking pan, spread with brown sugar and mustard, using a teaspoonful of mustard to two tablespoonfuls of sugar. Add the water from the pan, and bake occasionally. Bake until well browned.

There's folks that chide their neighbors, An' there's folks that pass you by; There's folks that hold their troubles Till you nearly want to cry. There's folks to crush the weaklings And there's folks to curb the strong, An' now an' then there's folks that like To jolly folks along.

NUTRITIOUS DISHES.

With eggs at the price they are I do not seem economy to use them in any quantity, but with food combination two or three eggs will supply the protein needed, yet make an inexpensive main dish.

Eggs and Dried Bee Scrambled.—Chop fine half a cupful of dried beef. Melt two table

spoonfuls of sweet fat in an omelet pan. Add the chopped meat, three-fourths of a cupful of tomato, a teaspoonful of scraped onion or a bit of juice half a teaspoonful of salt and a few grains of paprika; stir until hot, then add three beaten eggs and cook until the eggs are creamy throughout. Serve on squares of buttered toast or with baked potatoes.

Meat Loaf.—Put through a food chopper one pound of veal steak, half a pound of beef from the top of the round and one-fourth of a pound of cooked ham. Mix well, add two eggs beaten light, a teaspoonful of salt, a dash of paprika, two tablespoonfuls of chicken fat, two milk crackers rolled fine, onion juice, chopped parsley or Worcestershire sauce; shape into a loaf. Make a depression in the center and set in end for end two hard cooked eggs, removed from the shell. Cover the eggs in the loaf and place in a baking pan. Baste with hot fat and bake two hours. Serve hot or cold with a sauce made in the pan.

Do you know what it means to be losing the fight? When a lift just in time might make everything right? Do you know what it means, just a clasp of the hand, When a woman has stood just all she can stand? Were you a sister of hers when the time came of need? Did you offer to help her? Or didn't you heed?

SOMETHING GOOD TO EAT.

If one wishes a little ice cream for three or four sherbet cups, it may be made in a pound baking powder can. Any kind without acid may be used; fill the can two-thirds full, put on the cover and set into a deep jar filled one-third salt and two-thirds ice, let it stand until chilled, then turn the can in the mixture, occasionally removing the top and scraping down the sides. It will not take long to freeze and this saves using a large freezer when a small amount is needed.

One of the Thousand Isle Dressings.—Take half a cupful each of olive oil and lemon juice, one tablespoonful of grated onion, half a cupful of orange juice, three teaspoonfuls of minced parsley, eight olives chopped fine, eight cooked chestnuts also chopped one-fourth teaspoonful of salt, one teaspoonful of Worcestershire sauce, a dash of paprika and one-half teaspoonful of mustard. Shake in a mason jar until well blended.

Combination Salad.—Cut a small tomato into quarters or eighths leaving the sections together at the stem end. Arrange on lettuce and heap over this a tablespoonful of chopped celery a quarter of a thinly sliced pear and the tapering end of a banana, which may be placed in the center of the salad. Mix with boiled dressing and heap the minced and sliced mixture around the center. Shake a bit of paprika on the point of the banana and serve. A few grapes, skinned and seeded, may take the place of the pear or both may be added. The combination of flavor is especially pleasing with a mild salad dressing, enriched with whipped cream.

Beans and Bacon.—Take one can of tender string beans, drain and season well. Cut up two slices of bacon in small bits and fry until brown. Remove the bacon to the dish of beans and fry one small chopped onion in the hot fat; when the onion is well cooked, add the beans and when well mixed with the fat, add enough sharp hot vinegar to season well. Serve hot with frankfurter sausage.

Nellie Maxwell

Skirt Length Is Topic of Season

There's a new war on! Hostilities are being waged between the moderately short skirt advocated by American designers and the excessively abbreviated frocks insisted upon by the French couturiers, writes a prominent creator of fashions.

The short skirt reaching barely below the knees made its appearance in Paris last year and many stories came across to us concerning the display of silken hosiery observed at the leading French hotels where the fashionable Parisiennes gather for luncheon, tea and evening parties. This fashion of displaying French calves with a frankness that outranked even the French was not confined to bizarre extremists, but was adopted by the upper classes, the descendants of the old regime, who still constitute the aristocracy of France that dwells in the neighborhood of St. Germain.

When the races at Auteuille and Long Champs corroborated the evidence that the short skirt was an established fact, American designers hesitated and waited to hear the death knell of this fashion vibrate across the Atlantic. Instead of dying young, it continued to grow in favor.

The short skirt on this side of the ocean, which came into prominence several years ago, when a certain theatrical manager dressed his far famed beauty chorus in the short-long skirts reaching eight or ten inches from the floor, had been carried to such vulgar excess by any women lacking both

That is the aesthetic argument against the short skirt. Into the moral question I enter not. The American woman of good taste is capable of judging that for herself. You all know how many actually bow-legged women the short skirt has brought to notice. The

Charming Evening Gown of Brocade in Geranium Pink and Gold.

woman with such unfortunate physical defects should certainly avoid the short skirt. The older woman who has put on weight looks her worst in short skirts. Youth should possess attractive, slender ankles, yet many young girls show a thickness in their ankles which is far from symmetrically lovely, and very unattractive in a short skirt.

The evening gown of geranium and silver brocade casts another vote for the long skirt. This gown is apparently unsupported over the shoulders except by the unusual straps, apparently oblivious of their object in life. In reality two straps of flesh-colored satin follow the lines of the brocade straps and are attached to the back of the gown on either side of the center back.

A gown of gray charmeuse satin combined with gray chiffon falls in Greek-like lines which in the perfection of their drapery cry out against the short skirt. The front of this gown is interesting and shows a closing flatter to the figure. It runs cross-wise and fastens down one side where it continues into the bias of the skirt drapery. The one-piece effect of this gown is broken by the belt that defines the waistline on one side and disappears under the bound button-hole so as to leave the side closing in one continuous line. Gray chiffon folds are an interesting trimming on this gown.

In another evening gown that argues for the long skirt jade-green chiffon pleats eloquently and is ably aided by its unusual trimming, pendants of small jade-green beads strung on a thread.

American Woman Has Model Figure

The well modeled physique of the American woman is similar to the Greek ideal. It shows a gradual increase in the fullness of the leg beginning at the ankle and rounding into the calf. The French woman possesses a higher placed calf. Her legs are more like those of the professional dancer, which shows the biceps muscle rising more abruptly from the long slenderness of the ankle. The thinness of French legs makes the women of that country more adapted to wear the excessively short skirt than her American sister.

For these various reasons I am not making my gowns too short. My street dresses and tailored suits are eight inches from the floor and my afternoon gowns are this length and longer, depending upon the line of the drapery. Some are even floor length, which gives charming grace to the full-figured woman. Long draperies of black charmeuse satin, meteor or velvet take off pounds and pounds from the effect of the stout figure. How I wish every woman would realize this!

Dance frocks of net and other sheer

BOY SCOUTS

(Conducted by National Council of the Boy Scouts of America.)

SCOUT DOG AWAITS MASTER

Do you think a dog has a heart that hangs heavy when sadness comes, even as human hearts are laden with the coming of adversity? And do you suppose that canines weep when suns of happiness set and fail to rise?

Then give a thought to Jerry, the once frisky little Airedale with the wettest nose in all the world and the most beloved dog in Kansas. Jerry doesn't run around any more, nor does he find delight in rubbing up against the little tots whom he still must love.

He just sits with his little heart bursting, waiting for the return of the best pal he ever had, Paul Jeffords, whose scout uniform is laid away—never again to be worn.

For Paul is dead. If Jerry could read, he'd find the story in the reports of the war department—particularly in the short one which says: "Corporal Paul Jeffords, One Hundred and Thirty-seventh infantry, killed in action in the Argonne Forest."

But Jerry doesn't know that. He's waiting, even though the papers have told that Paul, true scout that he was, went West in the glory of scout-like heroism; that he cast himself through fire to certain death, dying for duty; that General Pershing himself hallowed his memory by rewarding him posthumously with the distinguished service cross.

But dogs can't read; so Jerry just sits on his hind paws and waits, sniffing hopefully day in and day out. Perhaps, up there, Paul, too, is waiting.

True friends are ever true.

SCOUTS IN VICTORY PARADE.

In the great Victory parade in London of the forces that successfully carried on the war, the boy scouts were given a place of honor. As a unit in the splendid naval force, the sea scouts appeared under their own flag, on their own merits.

They had been accorded this privilege in recognition of the work done by them for the country in carrying out coast-watching duties during the war. They were the more remarkable in being the only boys' organization taking part in the parade.

In the preparation of the great parade the boy scouts were again utilized behind the scenes by the authorities. With the troops of ten different nationalities assembled for the occasion, there was a great need of guides, or, perhaps, first-aiders and the other generally useful helpers. The authorities, as is now becoming their nature, turned to the boy scouts for help—and did not turn in vain. Some 1,700 scouts were employed on this duty during the week, and they acquitted themselves well.

SCOUT EXHIBIT FOR K. OF C.

The national movement looking to the organization of troops of the Boy Scouts of America in Catholic churches was given impetus in Louisville, Ky., by an official demonstration under the auspices of Louisville council, Boy Scouts of America, in the Knights of Columbus building.

The demonstration was arranged by the local organization of the Knights of Columbus as a result of a public letter, in which Cardinal Gibbons, the great Catholic leader in America, praised the good work of the boy scout movement and urged the formation of scout troops in Catholic churches whenever feasible.

Louisville has for some time had a scout troop in a Catholic church, this being the St. Francis of Rome church in the East end, and enjoyed the distinction of being one of a very few cities in America boasting scout units of this kind.

SCOUT OFFSETS SNAKE BITE

Bitten by a copperhead snake while picking raspberries near his home, near Northumberland, Pa., Myron Hopewell, seven years old, was saved from death by the prompt action of his brother, David Hopewell, fifteen years old.

The child was standing far in among the bushes; when he felt a twinge of pain, and looking down saw the snake with his fangs fast in his foot.

His brother attracted by his screams ran to his aid and killed the snake, which was two feet long. He then cut the skin on the boy's foot where the fangs entered, causing it to bleed freely.

Doctors say this saved the boy's life, and he did not get sick as a result of the reptile's attack. David Hopewell is a boy scout and learned his first aid methods while a member of the Northumberland troop.

WHAT KEEPS SCOUTS BUSY.

Scout Troop No. 5 of Highland Park, Mich., were the first ones to clear the ground for the new church home.

Scouts in Los Angeles collected tons of brush seed to be used in sowing over a burned area with a view to recreating the growth of brush which retards water flow.

The unsightly ruins left after a big fire in Catskill, N. Y., were such an eyesore that the boy scouts of Troop No. 1 cleaned up the place with a "good turn" for their city.

Nasty Colds

Get instant relief with "Pape's Cold Compound"

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a cold and ends all gripe misery. The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness. "Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance. Tastes nice. Contains no quinine. Insist on Pape's! Ad.

And There Are Other Public Bodies. "There are scientific questions," said Sir Oliver Lodge recently, "that will never be answered." One of these was recently propounded by the Basuto chief, who, after listening to the house of commons for an hour, asked what it was for.—London Punch.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

What He Did.

The Magistrate—It is charged that you used scurrilous language to this man, and then struck him with a dangerous missile.

Prisoner (indignantly)—Oh did nothing at the kind. Oh called 'im a lyin' pup, an' hit 'im wid a brick.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be dependent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, that great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

Had Seen It Before.

Little Bobbie was playing school with his grandma the other day. He answered the teacher quite intelligently pertaining to some of the capital letters of the alphabet. Grandma pointed to the capital letter "Y," asking him what it was. "That's easy," he replied, "that's a slingshot."

Important to Mothers

Examine carefully every bottle of CASTORIA, that famous old remedy for infants and children, and see that it

Bears the Signature of *Dr. J. C. H. H. H.* In Use for Over 30 Years. Children Cry for Fletcher's Castoria

Tribute to His Eloquence.

"Dat wuz a pow'ful appeal yo' made from de pulpit, Pahnson Simms."

"I'm right glad yo' thought so, Brudder Jackson. Wuz yo' moved?"

"Yes, sah; I frum puttin' I had to hol' mahself in frum pullin' somethin' in de contribution box."—Boston Transcript.

BOSCHEE'S SYRUP.

A cold is probably the most common of all disorders and when neglected is apt to be most dangerous. Statistics show that more than three times as many people died from influenza last year, as were killed in the greatest war the world has ever known. For the last fifty-three years Boschree's Syrup has been used for coughs, bronchitis, colds, throat irritation and especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning. Made in America and used in the homes of thousands of families all over the civilized world. Sold everywhere.—Adv.

Did Her Best to Get There.

When Lucy's teacher told her that she was five minutes late for roll call, she replied: "I didn't mean to be late, and if I hadn't runned all the way, I'd been a heap later."

Comparatively speaking, a miser's soul is smaller than a boarding house as bill.

Query: Does a man suffer more by ignorance or by knowledge?

The NEWS - Job Printing VOTE FOR THE BONDS

THE WOMEN'S CLUB.

By Mrs. Palmer Rhodes.

The Sierra Madre Woman's club held its regular monthly and social meeting yesterday afternoon. The attendance was unusually good and the program, which was presented by Mrs. F. P. Sperry, was enthusiastically received.

The Girls' Glee club of the Pasadena High school, under the able direction of their instructor, gave four selections, the rendition of which we cannot speak too highly, and responded to repeated encore with a final most pleasing number.

Miss Olive Pape of the Cumstock School of Expression in Los Angeles gave a reading entitled "The Prince Chap," by Edward Peple, which was indeed a rare test of memory, as well as of talent, Miss Pape holding the attention of the audience for many minutes.

At the close of the program the Parisian Gown Shop of Pasadena displayed a number of very beautiful georgette crepe gowns on living models, which was a novel finale to a very pleasant afternoon. Tea and wafers were served by Mrs. Charles Klunk and Mrs. Marian E. Lees.

Dramatic Section—Previous to the regular club program the Drama section held a meeting in the club parlors. Most of the time was spent in the reading and discussion of Shaw's "O'Flaherty V. C." and "Heartbreak House," and the lesson proved most interesting.

DINNER DANCE A SUCCESS

The dinner dance given last Friday evening by the Sierra Madre Woman's club was a most decided success, both socially and financially. The club house was artistically decorated, bamboo and acacia blooms being used with effective results. The table decorations were a profusion of color, each hostess having followed out her own ideas of decoration. The dinner itself was flawless and served with efficiency by a bevy of pretty smiling lassies. Numbers of beautiful gowns were in evidence, and guests from Pasadena and Los Angeles occupied places at many of the tables.

GRAMMAR SCHOOL NOTES

By George Johnstone

The Sierra Madre Grammar school on Monday, Jan. 25, hiked down to see General John J. Pershing at Ross Field, Arcadia. Many of us walked, while others rode in machines.

The school wishes to extend its thanks to the many people of Sierra Madre who so kindly responded to the call for machines to take the children down to the camp.

When we arrived many people were lined up to see the General, and Sierra Madre had a reserved place, as had many of the other schools.

General Pershing's machine drove in sight about 10 o'clock. As he drove along in front of the long line of waiting people, he saluted and doffed his hat. He looked striking in his full army uniform, and appeared exceedingly happy. He was presented with a beautiful bouquet by Miss Francis Willard, formerly a student of Sierra Madre school, and now attending Monrovia High school. He joked and laughed with the children and shook hands with as many people as he could, as he walked around the camp on his tour of inspection.

In honor of General Pershing's visit, a man leaped from a balloon in a parachute and carrier pigeons were sent out.

After a tour of inspection of the camp and reviewing the Arcadian soldiers, he left for Los Angeles.

The school has begun to have competitive games between grades. Last week the seventh and eighth grade girls played Harvey Bennett's indoor baseball team of fifth grade boys. The boys were victorious.

The eighth grade has become so interested in the tariff question arising between the Revolutionary and Civil wars which they are now studying that many arguments have arisen in class and they are now anticipating a debate.

The sixth grade is competing with the seventh and eighth grades for the prizes offered by the Sierra Madre bank for the best story or essay on the subject, "Lafayette, We Are Here." The story winning the first

prize will be published in the Mountain Echo, the school magazine.

The sixth grade girls and boys are very much interested in their manual training work. The girls are making needlework, holder cases, cooking aprons and caps in sewing. The boys have made pencil boxes, picture frames, broom holders, bread boards, book racks, coat hangers and sleeve boards.

The fifth grade are working on a table representation of the battle of Trenton, and for the past few weeks Washington has been crossing the Delaware (a glass river on the table) but never has been able to complete his journey. This will soon be on exhibition at the public library.

They are also making a large product map of the Central States. This class has taken up the subject of birds in nature study.

The fourth grade are now studying about the ocean and have made a splendid collection of starfish, shells, etc. They were presented with a cocoon and silk worm eggs and the children are interested in watching them grow.

Caroline Gibbons has returned to school after an absence of several weeks with a broken arm.

The third grade is making a sand table representation of the life of the Eskimos. They won the picture for the greatest number of parents present at the P. T. A.

Miss Church, the second grade teacher, is teaching art in the fourth and fifth grades while Mrs. Moore and Miss Sutton teach music in the seventh and eighth grades.

Mrs. Herrick presented the first grade with a beautiful fur.

Since the beginning of the new year the kindergarten children have made a constant study of time, the days, weeks, months and years. They have constructed clocks and watches and are learning to tell time.

In connection with their study of night and day they have made sunlight and moonlight suns.

LIFE FROM MY WINDOW

(By an ex-Service Man)

Life is real and beautiful. Perhaps that seems absurd to those of you who have, for months past, been suffering pain. We are living, you say, but we do not consider it beautiful by any means. Have you considered that it is, possibly, on account of some past inordination that you are now in your present state. Remember that this sickness is a great crisis, which we must all go through to be tested and tried for the greater things that are to follow. Your suffering is becoming a bore to you. You have lost all interest in life; you have decided to rest on your oars; you have come to the conclusion that all is useless! I have something for you. Listen to it. I found it last week while reading. Read it carefully, digest it and it will, possibly, give you another incentive to push towards the goal.

"To live on when life seems a failure and the comforts of life are gone; to count patient living the real living, with or without comfort—that is to be truly brave."—Philip Brooks.

Have you read Brooks? His books are full of tonics such as I quote here. Procure a copy from the library and study it. Get in touch with one who has experienced your troubles. He will help you, he will take you away from your emaciated body and, by his aid, you will discover vistas of thought which are so invigorating, that life will become so changed that it will again appear real and beautiful.

Pain is not true, ugliness is not real. That is why, as you consider yourself, you do not see life as it is. The beautiful has been made ugly, the real has lost its reality.

As the sun seems to shine all the more brilliantly after a heavy rain storm; so the individual, after a long seige of sickness and suffering, will display more sunshine and cheer. Do not despair at the seeming tardiness; do not give up hope, for if you are anxious to make your life beautiful again it can be done by your own persistence. Buck up and smile. It is always darkest before the dawn—and every cloud has its silver lining.

Read the wantads for bargains.

A CONTRIBUTION

To whom it may concern:

Having made my home in California over forty-two years, owning homes in various localities from the north to the south, now living in Sierra Madre over one year, I am seriously considering buying a home here, but there are several prohibitions in the way.

I listened to the able arguments on ways and means for water at the club house Monday evening which nothing precedes in California except the means to get it with. Tuesday morning in the mail comes the sample ballot for and against bonds for water and street repairs.

If the voice of the voter is the desire of the management, why are the ballots not shown plainly what the people want, the whole thing? Why not make the ballot a little longer? Shall not the voters have an opportunity to say, "Take the sure, safe road and by the least expense, secure, catch-up, gather and store the net supply gravity flow, at the earliest possible opportunity for safety."

While well No. 1 is out of commission, being drilled deeper, or a new well being drilled, as may seem best by those who know best.

Another prohibitive: I lived in the city of Riverside over five years, a delightful place, yet nature excels in Sierra Madre. Why not make the city government as good?

Fifteen years ago Riverside awoke to sense of duty to their children, and to the healthful ones, and built a hospital, having secured a plenty acreage outside the town, moved the cottages given up to the transient sick, whitewashed and made sanitary, built so there was plenty of room for all that came, where sick mothers do not put the culls in the child's hair to get ready for school, or the child run to the sick father, brother or sister for a last kiss when off.

My experience in Sierra Madre has taught me that many people, tired of the cold, damp, inclement climate of the beach, would flock to Sierra Madre for rest, recuperation, recreation and change they need.

They do come, but to find the inevitable distress of the sick on every hand. I am an old nurse and love to care for the sick, but when I am past the work, I want to be free from their moans and suffering, or my nerves cannot recuperate.

I am not speaking of those in their own homes; that is their right, we would only wish them a speedy recovery, but the transient sick, actually coming here to die, so lonely—would be better off and happier in one locality where doctors and even our city nurse could do more for them. I know of several other towns where this arrangement has been resorted to and proved a great success.

—Mrs. E. A. Ridsdale.

In the issues of Jan. 9 and 16, the News published the ordinance passed by the City Trustees calling an election for a bond issue to be held February 10. This ordinance explains for what purposes the money is to be used. As to the form of the ballots, they were printed in another city (as is the rest of the city printing) and we presume the copy was prepared by the city attorney and each item of the ballot explains the purpose for which the money is to be used.

As to the idea of a sanitarium, the News heartily agrees with Mrs. Ridsdale and if she or anyone else knows of a reliable, competent, professional man that is financially responsible, who will establish such an institution here he will find a warm welcome from 90 per cent of the taxpayers of Sierra Madre.—Editor.

NATIONAL TRAINING SCHOOLS FOR BOYS

Congress is considering the question of universal national training for every boy between 18 and 19 years of age. It is hoped that legislation will be enacted that will result in establishing camps throughout the United States, to which each year the boys as they reach the age of 18 months, will be sent for a period of six months.

These camps will be great training schools for American citizens where the boys from every section, of every class, boys from the small cities

and towns and the farms will be brought into contact with the boys from the cities; where the boys of rich parents will meet and associate with the boys of poor parents; where the American born boy will be brought into close contact with the foreign born boy.

You can picture the wonderful effect on the nation of the rich man's boy and the poor man's boy sleeping on cots side by side for a period of six months, eating at the same table, sharing the same duties and the same modest pleasures, exchanging viewpoints day after day, and through these things forming life-long friendships. It means the breaking down of class distinctions that are forming and endangering the life of the republic. It means the absolute democratizing of our citizenship.

The boys will be taught in a practical way the advantages of citizenship and the duties of citizenship; they will be taught obedience to law and constituted authority; they will be taught the value of personal merit and initiative as the true basis of personal success. In other words it will make upstanding American men of our boys regardless of family connections or accident of birth.

In camp the boys will be subject to military discipline, and while the purpose is to make citizens for peace time the military training they would acquire would enable them to defend their country should its defense ever again be necessary.

If you approve of national training schools for our boys, write Congressman Charles H. Randall at Washington and ask his support for this proposition.

SIERRA MADRE PUBLIC LIBRARY NEW BOOKS

- Juvenile
- Gilchrist, B. B.—Cinderella's Granddaughter.
- Ingersoll, Ernest—Raisin Creek Exploring Club.

THE CENSUS MAN

Elmer Rhodes is busy taking the census of Sierra Madre and incidentally running into a lot of traits in human character that he did not know existed. Just why anybody should object to giving a plain answer to the very few simple questions on a blank book is inconceivable to the average mind.

JUST PURE RED CLOVER

Harper's Solid Extract of Red Clover (not a patent medicine) prevents the flu, cleanses the blood, restores convalescents and builds up the system. Recommended and sold by F. H. Hartman & Son.

Got something you want to sell? Tell it to the world in the wanted column. Results will surprise you.
